

RAR-4 RETRACT-A-ROLL

PNEUMATIC ROLLER TRACK SYSTEM

FREIGHT GLIDES ON AND GLIDES OFF. RAR 4 - IS A PNEUMATIC ROLLER TRACK SYSTEM

EASIEST CARGO LOADING IN YOUR TRAILER

Ancra's next generation pneumatic roller floor system uses retractable rollers to lift and slide containers to speed turnarounds. Loading and unloading is quicker, reducing handling time and lowering labor costs. Available for air freight or palletised freight, the system instantly converts back to a flat floor for general freight.

LIGHT WEIGHT, HEAVY DURABILITY

Steel top plate and rollers fend off forklifts. Lower sections are aluminum to reduce weight. All parts are easily accessed for inspection or repair. System is powered by pneumatics off the truck's existing air supply. Sealed bearings in skate wheels have lower rolling resistance and longer lifespan.

EASY TO OPERATE

Low pressure pneumatic system runs off your truck's air supply. No other air supply is needed.

EASIEST TO MAINTAIN

Hi-strength, 11-gauge stamped, interlocking steel top plates are easy to remove for maintenance, only being held in place with two screws.

QUICKER

Faster air bag deflation

FAST OPERATION

Large 3/8" Air Lines Allow for the Quickest Inflation/Deflation on the Market

EFFORTLESS

Improved roll resistance of the Dual Skate Wheels

DUAL SKATE WHEEL

Roller opening
Smaller opening in the top plate keeping debris from falling through

SKATE WHEEL CONFIGURATIONS

WING MOUNT
